**WELCOME TO CSA
AN ITALIAN PRODUCER
OF SHOWER
ENCLOSURES**

”

30 YEARS BETWEEN TRADITION AND INNOVATION

For more than 30 years, in Tecnocity's technological district near Turin, we have been designing and manufacturing two complete lines of shower boxes and enclosures in steel and aluminium.

Inspired by the 4.0 industrial model, we are therefore developing a customised industrial and serial production: in fact, among our clients, we can proudly count the famous Azimut shipyards, always justly considered to be one of the most sought after reference benchmarks for design and quality at world level.

MORE THAN

5.000.000

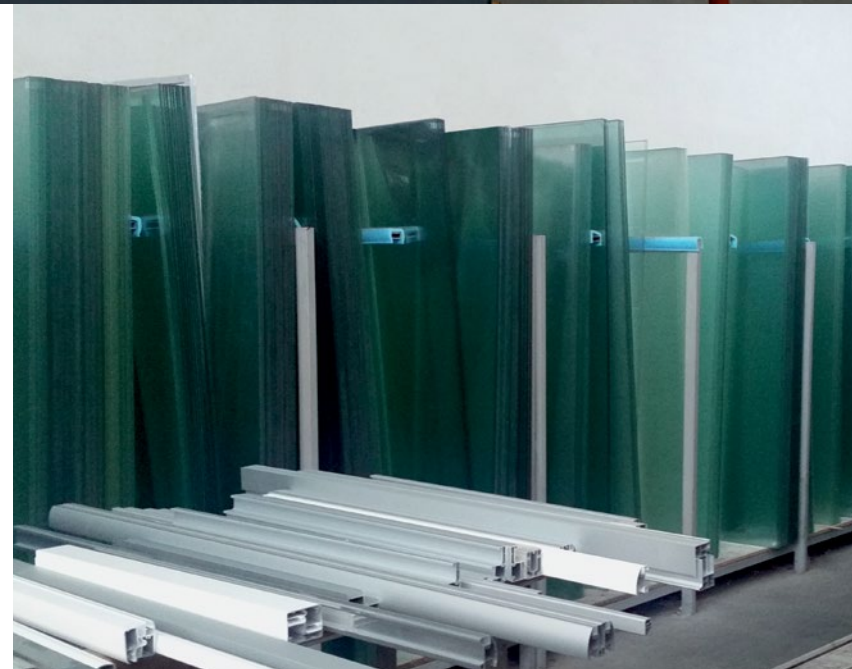

SHOWER ENCLOSURES PRODUCED

7.000 SM

PRODUCTION AREA

100%
MADE IN ITALY

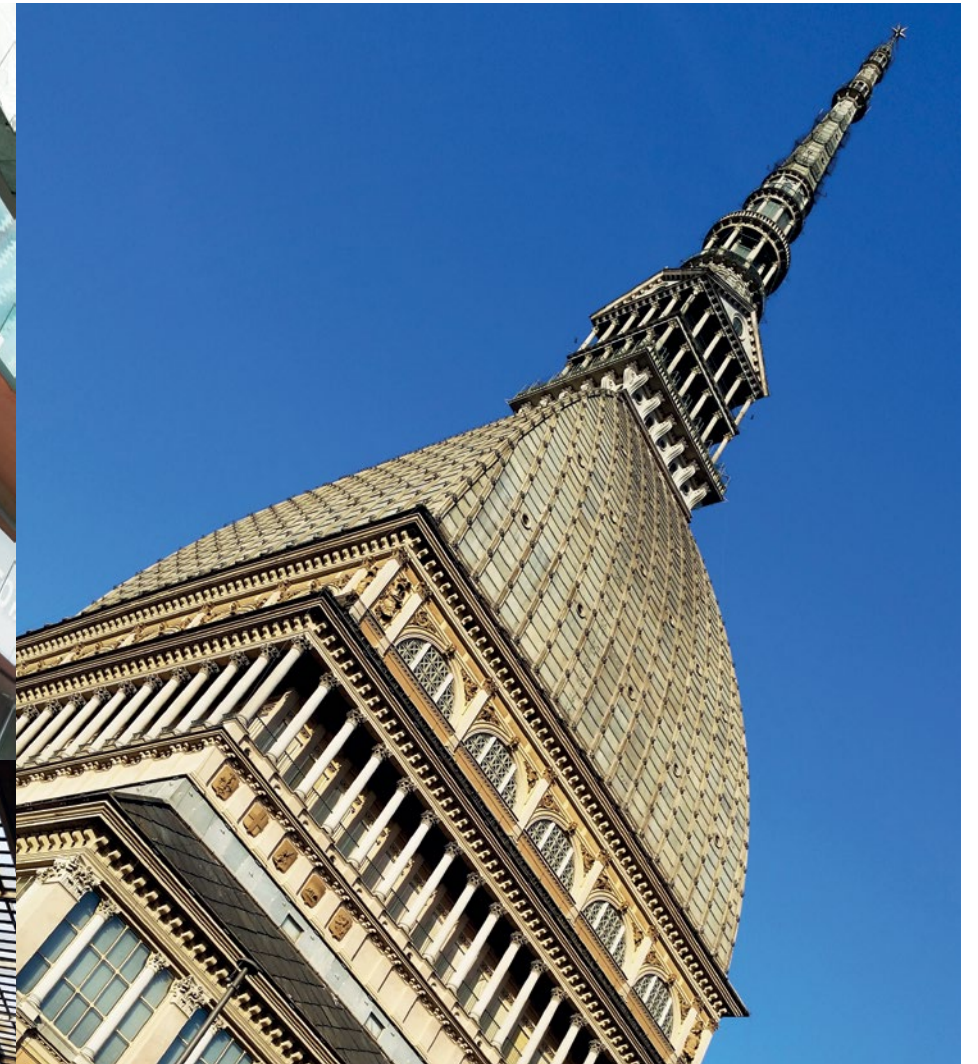

The production stages for the entire range are implemented totally within the company. For this, spaces were designed and organised according to a stringent layout which allows for a maximised rotation of productive cycles, guaranteeing utmost efficiency. It is above all due to this type of organisation that CSA is, with the greatest flexibility, able to operate in and manage the "made to measure" concept and product customisation for the entire range.

STRATEGICALLY LOCATED IN TURIN CITY

CSA is part of the territory and loves its resources, in the very heart of "Italianism", where entrepreneurship is widespread and where Turin's industrial tradition can still be breathed. The firm is established in an area dedicated to innovation, founded in fact in the vicinity of an absolutely vibrant City, open to change and opportunity. Turin is historically synonymous with a city that is both industrious and ingenious, besides also being an important centre offering culture and excellence that are acknowledged throughout the world.

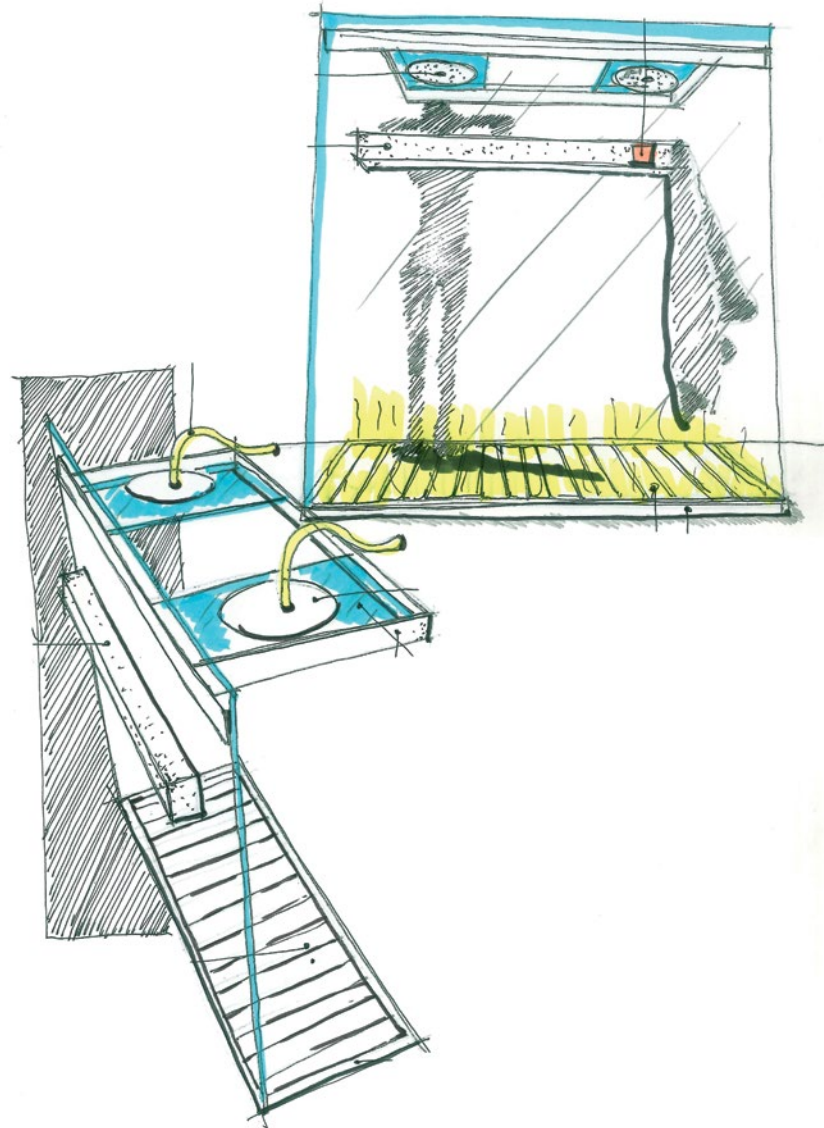

“

***THE DESIGN,
THE REAL FACE
OF OUR DNA***

”

ITALIAN DESIGN AS EXPRESSION OF IRRESISTIBLE FUNCTIONALITY

Our product is born of a philosophically "tailor made" approach, with a design that is typically Italian. CSA projects are studied to allow for the creation of a wide range of standard models, but at the same time are devised with a view to creating totally customised products, made to measure, suited to all types of use, to specific demands and totally compliant with ergonomic canons.

AZIMUT
YACHTS

*OUR ENDLESS GOAL:
HIGH QUALITY
CUSTOM MADE.*

The ability to satisfy the specific demands of all client types has made possible a constant collaboration with important brands of the Italian yachting industry. Each enclosure is designed following the hull lines of each boat, perfectly adapting to the inner walls. This is a continually developing sector, with the study of increasingly innovative and elegant details for very refined ambiances such as those found on yachts. Despite limited spaces, shower enclosures are created with 8 mm glass plates and stainless steel frames for a style that is both minimalist and refined.

This flexibility was used in the caravan and mobile home sector as well, making it possible by combining "alubond" walls with glass niche doors, to create in minute spaces as well, that intimate feeling that only a glass shower enclosure can provide, without overlooking the benefits of the shower area being isolated from the rest of the bathroom, with the cold being kept at bay and water leakages avoided.

Here are some typical examples of our installations, tailored for Azimut yachts.

THE WELLNESS SPA AT HOME

Dhēsia

Height

216 cm

Length

120 or 140 cm

Width

85 cm

Crystal Glass Thickness

6 mm

Functions

- steam bath
- shower head with three jets options: raindrop, misting, waterfall shower
- jacuzzi, back hydromassage
- foot spa
- colour therapy
- music therapy
- digital touchscreen tablet

Specifications

- stainless steel profiles
- wall in Touchstone White, texture "Rasato"
- door and front panel in crystal transparent glass
- steel handheld shower head
- stainless steel handle
- stainless steel shower head
- stainless steel hydro massage jets
- stainless steel tablet support
- removable footplate made of Touchstone White texture "Rasato", with a system of cushioning springs covered in silicon resin
- anti-limescale treatment
- anti-scale and antibacterial profiles finish
