48 ANNI DI BOX DOCCIA

2.B

Insieme dal 1975.

La nostra è una storia che ha nella chiarezza, limpidezza e lucentezza un trait d'union che si tramanda di generazioni. Partiti nel 1975, siamo oggi una realtà consolidata tra le più importanti in Europa che produce cabine doccia con profili in alluminio anodizzato e pannelli in cristallo.

Possiamo affermare a pieno titolo di essere entrati nella quarta rivoluzione industriale avvalendoci del sistema di industria 4.0. Se parliamo di trasparenza c'è un duplice motivo: abbiamo ridefinito gli schemi produttivi, accorciato i tempi di lavorazione e reso il nostri prodotti tracciabili in ogni fase; parallelamente, la crescita dell'azienda che conta oggi oltre settanta dipendenti non ha mai perso quei valori familiari da cui è partita.

Our history is based on clarity, clearness and shine, values handed down from generation to generation. Started in 1975 we are today a consolidated reality among the most important companies in Europe manufacturing shower enclosures with aluminium profiles and crystal tempered panels.

We can fully affirm that we have entered the fourth industrial revolution using the system of industry 4.0. Talking about transparency, we have redefined the patterns of production, shortened the processing times and made all our products traceable in every phase. In addition to that, our company which has experienced continual growth and counts today more than 70 workers has never lost the family values of its founder.

MODULA

Modelli/ Models

Modula è il nuovo sistema di pareti modulari firmato 2B. Eleganti e non invasive, le pareti in vetro e alluminio suddividono lo spazio con leggerezza, adattandosi sia a contesti moderni che tradizionali.

Modula is the new modular wall system signed 2B. Elegant and non-invasive, the glass and aluminium walls divide space with lightness, adapting to both modern and traditional contexts.

MODULA

SISTEMA MODULARE

Il sistema Modula di 2B Box docce riflette la nostra ambizione di creare prodotti di design e qualità senza compromessi.

A prima vista, l'architettura di questo sistema si rivela già molto semplice, ma è entrando nel dettaglio che dimostra la sua versatilità polivalente. Modula è disponibile con pannelli verticali o orizzontali, nelle misure che vanno da 50/60/70/80/90/100 cm per quelli verticali e 100/120/140/160 cm per quelli orizzontali. La semplice griglia di Modula consente di costruire composizioni aperte o chiuse con pannelli laterali e porte.

The modular system of 2B Box Docce reflects our ambition to create products of design and quality without compromise.

At first glance, the architecture of this system reveals its simplicity, and going into detail it demonstrates its multipurpose versatility. Modula is available with vertical or horizontal panels, in sizes ranging from 50/60/70/80/90/100 cm for vertical ones and 100/120/140/160 cm for horizontal ones. The simple modulation grid allows you to build open or closed compositions with side panels and doors.

Il trattamento antigoccia che semplifica la pulizia del cristallo

BrillBox® è un trattamento invisibile che produce sul cristallo un effetto antigoccia. L'acqua non aderisce e le gocce scorrono sul cristallo, facilitando la rimozione di aloni e depositi di calcare. Attraverso un processo chimico, un film protettivo trasparente viene steso sulle porosità microscopiche della superficie del cristallo provocandone la chiusura definitiva, creando così una barriera protettiva durevole nel tempo.

GARANZIA

Le prove di laboratorio dimostrano che BrillBox®, seguendo i consigli d'uso, ha una durata fino a 4 anni. Non è nocivo ed è privo di sostanze chimiche dannose.

CONSIGLI D'USO

Pulire periodicamente la superficie del cristallo con un panno morbido leggermente umido. Non usare detersivi e/o detersivi abrasivi.

Brillbox® is a surface treatment producing an anti-drop effect on glass. Water does not adhere to the glass surface and drops slide along, avoiding lime scale and making the daily cleaning routine easier. Through a chemical process, a transparent protective film is applied to the microscopic porosity of the crystal surface filling it permanently and creating therefore a protective barrier lasting over time.

WARRANTY

The endurance lab tests show the Brillbox® by 2B Group could last up to 4 years, following the correct maintenance suggestions. The treatment is not harmful and does not contain dangerous chemical components.

ADVICE

Clean the glass surface with a slightly wet and soft cloth regularly. Do not use abrasive or aggressive cleanser.

Sgancio ante, igiene facile e sicura.

2B Box docce ha ridefinito il concetto di sgancio dell'anta, rendendone più attuale l'estetica e raggiungendo la massima efficienza tecnologica eliminando qualsiasi pulsante.

Per compiere la pulizia di routine del vetro è sufficiente imprimere una leggera pressione sulla maniglia accompagnandola verso la parte interna del box doccia, ed ecco che il vetro è libero. Questo meccanismo di sgancio che permette di avere l'anta libera è disponibile per le collezioni H2, 3MILA e MILLE.

2B Box docce has redefined the concept of « release » system of the shower door. It has given it a more modern aesthetics and has achieved the maximum technological efficiency by eliminating any button. To carry out the cleaning routine of the glass, it is sufficient to imprint a slight pressure on the handle accompanying it towards the inside of the shower, and in that position the glass is free. This release mechanism is available for the H2, 3MILA and MILLE collections.

Pellicole “high safety shower”, la sicurezza in più che non si vede.

Box Docce 2B produce cabine doccia con cristalli temperati come da normativa UNI EN 14428. Il cristallo temperato in caso di rottura forma piccoli frammenti inoffensivi, non pericolosi per le persone.

Box Docce 2B manufactures since many years shower enclosures equipped with tempered glass in compliance with the UNI EN 14428 regulation in force. In case of crash, the tempered glass collapses into harmless fragments, avoiding damages to people.

La pellicola di sicurezza “HIGH SAFETY SHOWER” applicata ai cristalli trasparenti delle cabine doccia da 6-8 mm aumenta la resistenza lasciando inalterata la trasparenza. In caso di rottura, la pellicola “HIGH SAFETY SHOWER”, trattiene i frammenti ed esercita un’azione di assorbimento dell’energia d’urto.

The “HIGH SAFETY SHOWER” safety film applied to the transparent crystals of 6-8 mm of the shower enclosures increases the resistance leaving the transparency unchanged. In case of rupture, the film “HIGH SAFETY SHOWER” retains the fragments and exerts an absorption action of the energy of impact.

Il prezzo di listino è di 160,00 €/m² esclusivamente solo su richiesta. I tempi di consegna sono 25 gg lavorativi.

Price list € 160,00 per sq.m. and on demand. The delivery time for crystals is 25 working days from order day.

Pulizia: eseguire la normale pulizia del cristallo con panni morbidi, evitando detersivi o sostanze abrasive/corrosive. Non incidere la superficie per non comprometterne la resistenza meccanica. Non applicare adesivi o decalcomanie sulla pellicola.

Cleaning: clean the glass surface with a slightly wet and soft cloth regularly. Do not use abrasive or aggressive cleanser. Do not carve the glass surface or apply adhesive tapes on it.

High safety shower

Pellicola “HIGH SAFETY SHOWER” su richiesta.

“HIGH SAFETY SHOWER” film on request.

La pellicola “HIGH SAFETY SHOWER”, trattiene i frammenti ed esercita un’azione di assorbimento dell’energia d’urto.

The film “HIGH SAFETY SHOWER” retains the fragments and exerts an absorption action of the energy of impact.

Il cristallo temperato (senza pellicola) in caso di rottura forma piccoli frammenti inoffensivi, non pericolosi per le persone.

The tempered glass (without film) collapses into harmless fragments, avoiding damages to people

PIATTI DOCCIA

Grazie a Mineralsolid® 2B propone per i piatti doccia quattro nuovi colori inalterabili nel tempo.

Mineralsolid® è un materiale composto per il 70% da cariche minerali naturali (carbonati di calcio e triidrata di alluminio) e 30% da resina poliestere. La superficie materica piacevole al tatto ricorda l'effetto della pietra naturale e il design contemporaneo si distingue per purezza formale ed eleganza.
