

tender rain®

tender rain®

A nord-est del Piemonte ha sede l'azienda produttrice degli articoli a marchio tender rain®, preziosa realtà di riferimento per il settore doccia. Nel corso degli anni ha sviluppato tecnologie d'avanguardia avvalendosi di una consolidata esperienza, di una rigorosa ricerca e di un parco macchine di alta tecnologia. Tali requisiti consentono di realizzare progetti innovativi finalizzati a vestire il proprio know-how tecnologico con un design rivoluzionario e di classe. La volontà di muoversi in un contesto di creatività tecnologica finalizzata alla soddisfazione dell'utenza è la prioritaria vocazione aziendale che ambisce a coniugare forma e funzione con innovazione, qualità e design. Le soluzioni doccia tender rain® hanno anticipato le tendenze del settore e contribuiscono a rafforzare il successo del Made in Italy nel mondo.

tender rain® is located in Northeast Piedmont and is an innovative business in the shower field. Over the years, it has developed pioneering technologies, wide experience, constant research and a modern machinery inventory. These features allow to finalize important projects and to combine technological know-how together with revolutionary design. **tender rain**® works in a technological creative atmosphere to ensure a complete customer satisfaction. Our forward-thinking vision has led to a total commitment to accuracy in quality, innovation and aesthetic impact. Our pioneering shower solutions play an important role on the international scene and contribute to spreading the influence of Italian design.

tender rain® est une entreprise innovante, spécialisée dans les pommes de tête et colonnes de douches, située dans le nord du Piémont. Au fil des ans le service de recherche a développé des technologies d'avant-garde assisté d'un outil industriel à la pointe de la technologie. Toutes les solutions de douche donnent à la salle de bain élégance, prestige et modernité et la qualité italienne des produits permet d'offrir d'excellentes performances. Les produits **tender rain**® sont 100% italiens, ils possèdent la primauté d'une forme minimaliste, rationnelle, couplée à un système constructif breveté. Ces caractéristiques sont destinées à la satisfaction et au bien-être des consommateurs. Les solutions de douche **tender rain**® ont anticipé les tendances du secteur et contribuent à renforcer le succès du Made in Italy dans le monde.

Der Hersteller der Artikel der Marke **tender rain**® hat seinen Sitz im Nordosten der Region Piemont und ist heute ein wahrer Bezugspunkt für den Bereich Duschanlagen. Im Laufe der Jahre hat das Unternehmen modernste Techniken entwickelt, die sich auf solide Erfahrung, rigorose Forschung und einen High-Tech-Maschinenpark stützen. Nur so können innovative Projekte entwickelt werden, deren Ziel darin besteht, das technologische Know-How des Unternehmens mit einem revolutionären Design erlesenster Qualität zu paaren. Duschköpfe und Duschsäulen von **tender rain**® sind zu 100% italienische Erzeugnisse. Sie zeichnen sich durch rationalen Minimalismus und – dank einem patentierten System – durch beste technisch-funktionale Eigenschaften aus. So stehen die modernen Badezimmer nicht nur im Zeichen von Eleganz und Prestige, sondern werden jetzt auch zum persönlichen Wellness-Bereich. Die Duschlösungen von **tender rain**® haben die Tendenzen des Sektors vorweggenommen und tragen dazu bei, den Erfolg des Made in Italy weltweit zu stärken.

Punti forti dei prodotti tender rain®

- 100% made in Italy
- materie prime **atossiche** e certificate
- risparmio idrico e risparmio energetico
- sistema antisedimentazione
- totale ispezionabilità
- getto tonificante anche a bassa pressione: da 0,5 bar
- facilità di installazione e manutenzione
- adattabilità a impianti preesistenti
- dispositivo di rapido fissaggio per installazioni a controsoffitto
- possibilità di personalizzazioni
- installazione indoor e outdoor
- design esclusivo
- ampia scelta di finiture

Key points of tender rain® products:

- 100% made in Italy
- certified and **non-toxic** raw materials
- water and energy saving
- no water sedimentation
- inspectability
- invigorating shower also under low pressure
- easy installation and maintenance
- easy to adapt to the existing plumbing
- quick-fixing device for false ceiling installation
- on demand customization
- suitable for indoor and outdoor
- exclusive design
- wide choice of finishes

Principales caractéristiques des produits tender rain®:

- produits 100% italiens
- matières premières certifiées **non toxiques**
- consommation économique d'eau et d'énergie
- système anticalcaire sans rétention d'eau
- possibilité d'inspection
- jet tonique même à basse pression: à partir de 0,5 bar
- facilité d'installation et d'entretien
- adaptabilité aux installations préexistantes
- dispositif de fixation rapide pour l'installation au contre-plafond
- possibilité de personnalisation
- installation à l'intérieur et à l'extérieur
- design exclusif
- disponibilité de plusieurs finitions

Diese sind die wesentlichen Eigenschaften der tender rain® Produkte:

- 100% italienische Produkte
- aus zertifizierten und **ungiftigen** Materialien
- Wasserersparnis und Energieersparnis
- Anti-Bodensatzsystem
- totale Prüfbarkeit
- tonisierender Wasserstrahl auch bei niedrigem Druck: ab 0,5 bar
- mühelose Montage und Instandhaltung
- Anpassung an existierende Systeme
- Vorrichtung für schnelle Montage an Blenden Decken
- Personalisierungsmöglichkeiten
- Indoor- und Outdoormontage
- exklusives Design
- große Auswahl an Oberflächen

tender rain® risponde alle esigenze tecnico-estetiche del mercato ampliando la sua gamma di soluzioni doccia interamente fabbricate in Italia. Oltre alla consolidata produzione di articoli in ottone a basso tenore di piombo, l'esperienza nelle lavorazioni dei metalli ha portato all'implementazione delle collezioni in acciaio inossidabile.

Le tonalità fredde ed eleganti dell'acciaio rispondono al gusto minimalista imperante nel mondo del bagno, senza dimenticare le straordinarie prestazioni di questo materiale: resistenza alla corrosione, minima manutenzione, igiene ed eco-sostenibilità. Lavorazione con macchine a controllo numerico, scrupolosità della spazzolatura, collaudo di ogni singolo pezzo garantiscono, anche nelle collezioni in acciaio inox, il mantenimento degli alti livelli di precisione e qualità che contraddistinguono tender rain®. Tutti i prodotti sono fabbricati in acciaio inossidabile italiano certificato: AISI 316L e AISI 304L.

The technical and aesthetic needs of the market led **tender rain®** to a great extension of its range of Italian shower solutions. In addition to all the products in low-lead solid brass, the outstanding experience in metal processing techniques resulted in new amazing collections in stainless steel.

The cold and elegant shades of steel meet the minimalist taste that prevails in the current bathroom inspiration style, together with the noteworthy performances of this raw material: hygiene, environmental sustainability and the highest resistance to corrosion. Thanks to the use of CNC machines, the scrupulous brushing operations and the accurate test of every single piece, tender rain® assures its high precision standards also in this new repertoire, which is made in AISI 316L and AISI 304L Italian certified stainless steel.

tender rain® répond aux besoins techniques et esthétiques du marché en élargissant sa gamme de solutions de douche entièrement fabriquées en Italie. En plus de la production consolidée d'articles en laiton, l'expérience dans les techniques de traitement des métaux a conduit à la mise en œuvre des collections en acier inoxydable. Les nuances froides et élégantes de l'acier répondent au goût minimaliste qui prévaut dans le monde de la salle de bains, sans oublier les performances extraordinaires de ce matériau: résistance à la corrosion, entretien minimal, hygiène et durabilité environnementale. L'utilisation professionnelle de machines à commande numérique, le brossage scrupuleux et le contrôle de chaque pièce garantissent, même dans les collections en acier inoxydable, le maintien des hauts niveaux de précision et de qualité qui distinguent tender rain®. Tous les produits sont fabriqués en acier inoxydable italien certifié: AISI 316L et AISI 304L.

tender rain® geht auf die technisch-ästhetischen Anforderungen des Marktes ein, indem sie ihre Produktpalette für Duschen erweitert, die vollständig in Italien gefertigt werden. Neben der bereits fest verankerten Herstellung von Artikeln in bleiarmer Kupfer hat die Erfahrung in der Verarbeitung von Metallen zu der Einführung der Kollektionen in rostfreiem Stahl geführt.

Die kühlen und eleganten Farbtöne des Stahls entsprechen dem vorherrschenden minimalistischen Geschmack in der Welt des Bades, ohne die hervorragenden Eigenschaften dieses Materials zu vergessen: Korrosionsbeständigkeit, minimaler Pflegeaufwand, Hygiene und ökologische Nachhaltigkeit. Die Verarbeitung durch Maschinen mit numerischer Steuerung, die Sorgfältigkeit beim Bürsten des Stahls sowie die Abnahmekontrolle bei jedem einzelnen Stück garantieren, auch bei den Kollektionen in Edelstahl, die Einhaltung des hohen Niveaus in Präzision und Qualität, die tender rain® ausmachen. Alle Produkte werden aus zertifiziertem italienischen rostfreien Stahl hergestellt: AISI 316L und AISI 304L.
