external corners profiles

A line dedicated to the protection and finishing of outside corners of the wall tiles. Profiles are suitable for any type of environment for the variety of finishes available, matching perfectly with all types of ceramics and giving character to the compositions and linearity.

cerfix® proangle Q

Proangle Q in aluminium is a line of universal profiles with square shape, specially designed to edge and protect the external corners of ceramic coverings, that can be also used for finishing worktops and platforms. ZQVNH/ boasts the certified antibacterial technology (according to the internationally recognized laboratory test JIS Z 2801:2000) which reduces the presence of the most dangerous bacteria up to 99%, thus assuring the best hygiene over time.

cerfix® proangle Q

Colour-coated aluminium Trend Color Stone: modern finishes with neutral but warm and soft shades which reproduce the heterogeneity of stone thanks to a rough texture.
Colour-coated aluminium Trend Color Concrete: six original cement-effect finishes that recall the typical metropolis colours by revisiting them from a more refined point of view.
Colour-coated aluminium Trend Color Metal: two special metal tonalities which reproduce the iridescent nature of metals.

cerfix® proangle Q

Proangle Q in stainless steel is a line of universal profiles with square shape, specially designed to edge and protect the external corners of ceramic coverings. They are also particularly suitable for the edging and the protection of floors and steps in different materials, such as ceramic, stone, wood and resins, and can be also used for finishing worktops and platforms.

Stainless steel makes the profile particularly resistant to chemical and atmospheric agents. The AISI 316 DIN 1.4404 quality offers superior resistance to corrosion and is therefore recommended for applications in areas subject to greater chemical stress, such as swimming pools and food industries, and coastal areas.

ZQLN/10 polished brass

cerfix® proangle Q

Proangle Q in coextruded PVC is a line of universal profiles with square shape, specially designed to edge and protect the external corners of ceramic coverings. Thanks to the special section with soft PVC inserts, these profiles absorb the micro-movements that discharge on the corner due to the tension of the wall coverings.

cerfix® proangle

Proangle in aluminium is a line of profiles for edging and protecting the external corners of ceramic coverings. Its L shape outlines clearly tile coverings, such as rectified porcelain stoneware. Available in different colours and finishes, Proangle can also be used as decorative element, creating refined and pleasant combination/contrast effects with a wide variety of coverings. ZQVNH/ boasts the certified antibacterial technology (according to the internationally recognized laboratory test JIS Z 2801:2000) which reduces the presence of the most dangerous bacteria up to 99%, thus assuring the best hygiene over time.

cerfix® protrim

Protrim in stainless steel is a line of profiles with rounded shape, specially designed to edge and protect the external corners of ceramic coverings and also recommended for floors, steps, worktops and platforms. The AISI 304 versions are recommended for food industries, kitchens, hospitals and outdoor spaces, while the AISI 316 versions are suggested in case of difficult applications, such as swimming pools, spas and places exposed to salt.

cerfix® protrim

Protrim in coextruded PVC is a line of profiles with rounded shape, specially designed to edge and protect the external corners of ceramic coverings. Their shape also acts as symmetric finishing and helps preventing accidents. Thanks to the special section with soft PVC inserts, these profiles absorb the micro-movements that discharge on the corner due to the tension of the wall coverings. Mass-dye coloured, they are available in many different colours and can be used in the most varied spaces.

cerfix® probord

Stainless steel Probord ILN is a security profile for the outside corners of wall tiles. It can be combined with the profiles Proround M and it is recommended for the prevention of accidents and in environments where high hygienic safety is also required such as kitchens, food industries, schools etc.. The version in AISI 316 stainless steel is suitable for swimming pools, spa and in environments exposed to salt.

cerfix® proround

Stainless steel Proround M is a connection profile to be used in situations that require a particular level of sanitary protection (eg, medical, food industry, swimming pools, spas, industrial kitchens, hospitals, etc.). Specifically, the version in quality AISI 316 DIN 1.4404 offers characteristics of superior resistance to corrosion and is therefore recommended for use in areas subjected to higher chemical attacks, and sea zones.

cerfix® proround

Proround M GIC/ and Proint PIN/ are two stainless steel profiles with rounded shape for the connection of floors and walls, to be used in those spaces where special hygiene protection is required.
The shape of GIC/ is particularly versatile thanks to the internal fixing flange.
The shape of PIN/ facilitates the corner connection of floors and walls, thus guaranteeing the expansion between the two surfaces.

Proint PIA/ and PI/ are two line of profiles in aluminium and PVC, suitable as perimetral connection during the installation of the wall covering and the floor or as perimetral expansion joint.
The use of Proint PIA/ and PI/ allows to avoid the use of silicone for sealing and, in addition to the aesthetic advantage, it guarantees a high hygiene over time.
The special sections of Proint facilitate the corner connection between the wall covering and the floor, thus guaranteeing the expansion between the two surfaces.

linear shower drains and systems for bathrooms

Profilpas offers a wide range of solutions for bathrooms which combine functionality and modern design. In particular, Profilpas bathroom systems allow the creation of floor-level showers, with a wide selection of linear shower drains - like PP Drain Aqua, Thin Drain, Slim Drain and Smart Drain, all customizable with different grates - and Q-Drain, available in several models. Profilpas bathroom range also includes Glass Profile, a line of profiles for the insertion of glass walls and the finishing of the shower surface, designed to compensate the 2% slope.

PP Drain Aqua

PPdrain|Aqua

The linear shower drains PP Drain Aqua, made of stainless steel AISI 316 and provided with a patented removable siphon in antibacterial ABS, are a perfect synthesis of beauty and practicality. Profilpas has taken care of every aspect of their design, production and quality control, to offer a product that is always efficient and aesthetically perfect.

The linear shower drains PP Drain Aqua, composed of a single piece without welds, distinguish for their design and functionality that make them elegant, simple to install and easy to clean. Each part of the shower drain is studied in detail, to contain in few components all that is needed to guarantee the maximum ease of installation and maintenance.

Aesthetics

Elegant and exclusive design, customisable with a wide range of covers and finishes.

Removable siphon

The siphon is simple to remove and can be easily inspected, for the maximum efficiency.

Ease of installation

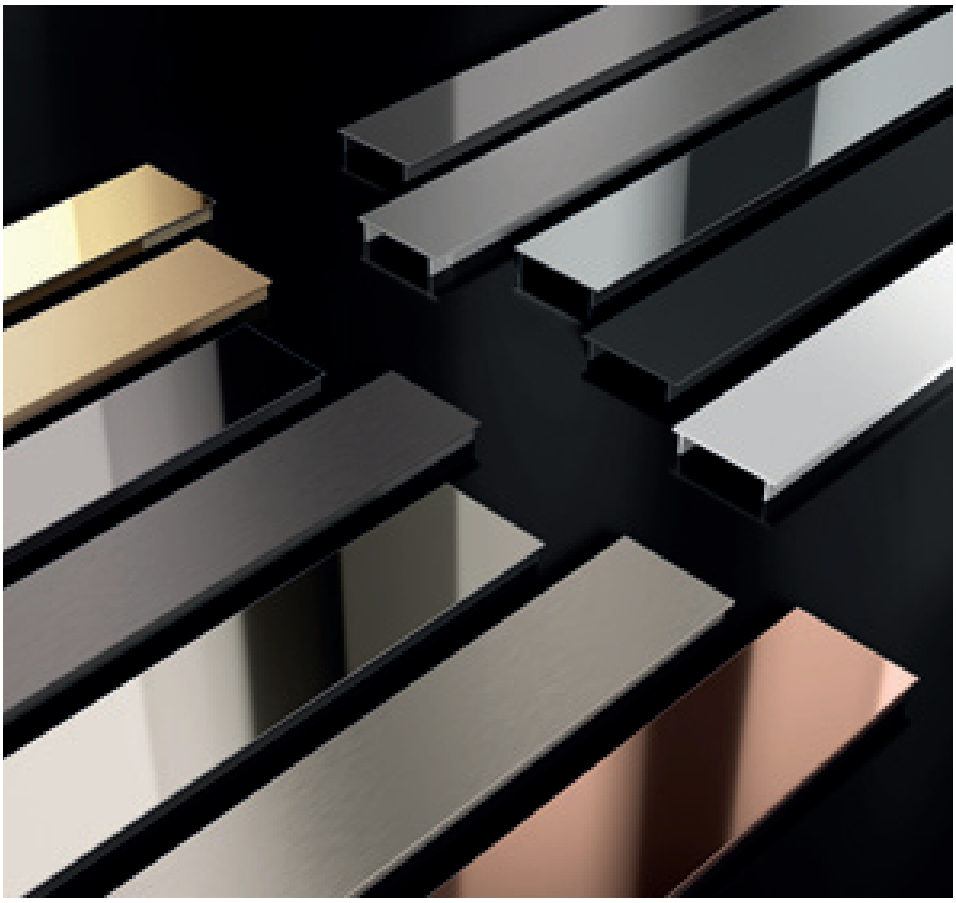
The assembly and the adjustment of the shower drain are simplified, for a simple and quick installation.

Cleanliness and hygiene

The removable siphon in antibacterial ABS simplifies the maintenance and allows a quick and efficient cleanliness.

PP Drain Aqua

The essentiality of the linear shape of the shower drain, combined to the beauty of the multiple finishes, allows to offer an aesthetically perfect solution, able to adapt to any kind of design and to any material (porcelain stoneware, marble, mosaic, natural stone...).



PP Drain Aqua

With PP Drain Aqua linear shower drains, maintenance and cleaning are fully simplified. The siphon, made of antibacterial ABS, can be removed and inspected completely. Furthermore, the AISI 316 stainless steel shower drain base is composed of a single piece without welds and sharp edges for the best hygiene and efficience. Studied to minimize installation times, they are equipped with a pre-glued waterproofing membrane, supports from 6 to 18 mm for the height adjustment of the covers and bases in polystyrene foam.

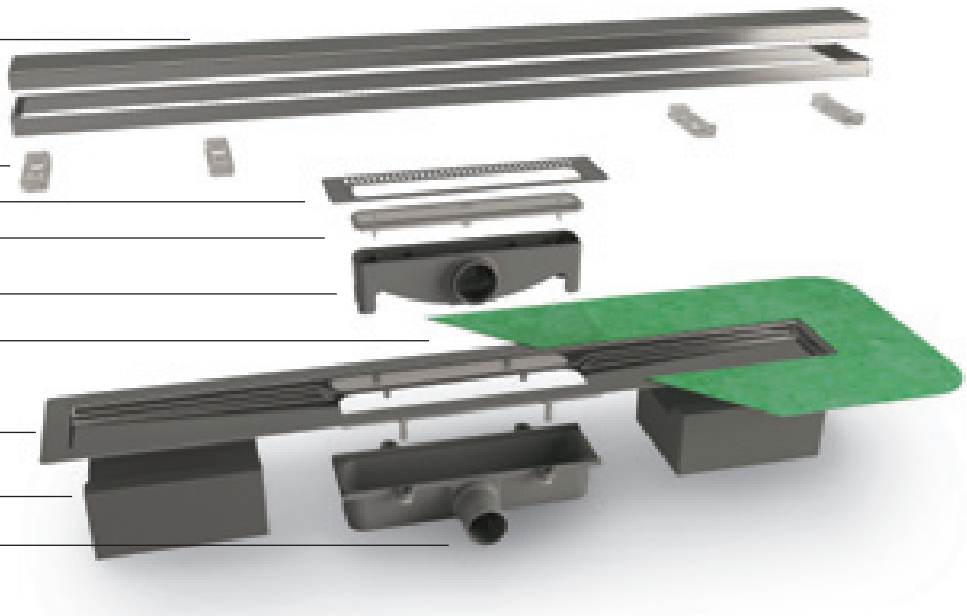
drain in antibacterial ABS



1 Different types of cover available.
2 The frame is present in Classic Cover model. The other covers are not equipped with frame.

Complete the article code with L measure (for example PP/ for L = 70 becomes PP/70)

PP Drain Aqua

Classic Cover, in polished or satin stainless steel AISI 316, is available in different lengths (from 60 to 120 cm). It includes the frame and the adjustment supports from 6 to 18 mm, and it is reversible: if turned upside down, it becomes tileable (up to 12 mm), thus creating aesthetic continuity with the bathroom covering.

thindrain

Thin Drain is a line of flush with the floor shower drains for a quick and easy installation, which allows to customize the shower with any kind of covering. Thanks to the syphon with low thickness and the height of the shower drain of just 55 mm, they are particularly suitable for refurbishments or in spaces where lightness and versatility are the main features.

ADVANTAGES

- Installation flush with the floor (it eliminates architectural barriers)
- Possibility of installation close to the wall
- Height of the shower drain of 55 mm (laying surface)
- Suitable for tiles with thickness up to 12 mm
- Possibility of laying tiles with thickness up to 12 mm with Tile Cover
- Shower drains with certification EN 1253-1 (minimum flow rate of 24 l/min)
- Supports for quick installation
- Integrated waterproof membrane to reduce the risk of seepages
- Possibility of inspection of the syphon for periodic cleaning
- Filter for cleaning/hair
- Quick installation
- Drain adapter from 4 to 50 mm included

Q drain

q-drain

Q-Drain is a line of point drainages for flush with the floor showers which are quick and easy to install and allow to customize the shower with any kind of covering. Provided with insulating flange and with a height of 72/78 mm, they are the ideal solution for traditional showers flush with the floor.

ADVANTAGES

- Installation flush with the floor (it eliminates architectural barriers)
- Height of the point drainage of 72/78 mm (laying surface)
- Directable syphon
- Shower drains with certification EN 1253-1 (minimum flow rate of 24 l/min)
- Integrated waterproof membrane to reduce the risk of seepages
- Possibility of laying tiles with thickness up to 10 mm with Q Drain Tile
- Possibility of inspection of the syphon for periodic cleaning
- Filter for cleaning/hair
- Quick installation

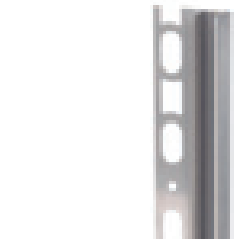
Glass Profile

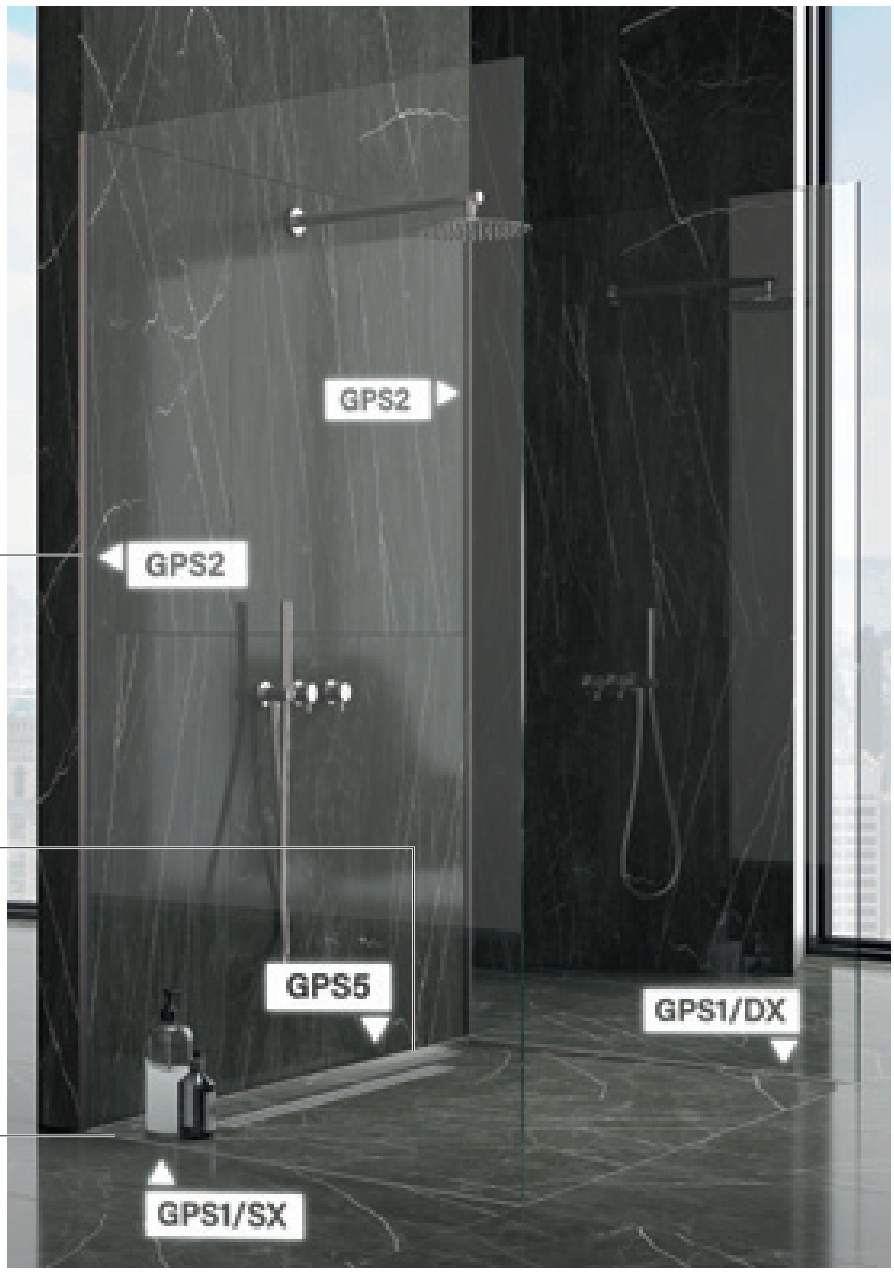
The floor-level shower is a trendy and design element that represents a real opportunity for designing bathrooms of every dimension, highlighting their practicality and beauty. Removing the traditional shower tray, the floor-level shower can be made with the same covering of the bathroom, thus creating a uniform and elegant surface. Moreover, the absence of architectural barriers makes the access easier for children, elderly people or disabled.

Profilpas offers a series of integrated solutions for floor-level showers: a system of linear floor-level drains in stainless steel, with the possibility of also opting for the invisible version, thus creating a whole with the shower ceramic covering, which is completed by a wide range of stainless steel profiles for the insertion of glass walls and for finishing the sloping surface.

glass profile

Glass Profile is a line of stainless steel profiles designed to cover the difference in height of the surface with 2% slope and create a coplanar surface with a modern and linear design. The range includes two finishes: satin stainless steel and matt black colour coated stainless steel. The versatility of these two colours become guarantee of elegance, assuring a minimalist and trendy effect.





glass profile

Glass Profile GPS1/ is a stainless steel profile for the insertion of glass walls of floor-level showers. GPS1/ is provided with a 2% slope on the shower inner side for a perfect aesthetic solution of the sloped surface.
On completion of the profile, there is GPS/6, the end cap for hiding the section of the glass wall.

profiles for floors of same height

The range of profiles is designed to combine different materials with elegance and simplicity. The coupling of different materials thus becomes interior style and not visual limit.

cerfix® proangle

Proangle is a line of profiles to finish, protect and decorate floors of same level in ceramic, marble, granite, wood or other material. It is also ideal as separation and decoration joint between floors made of different materials, as finishing and protection element for the edges of steps, platforms and worktops and as perimeter profile for the shaping of doormats. Proangle B in natural aluminium is particularly suitable where it is necessary to proceed to polishing, even deep, of marble, resin and wood surfaces.

cerfix® prodecor

Prodecor and Prodecor DJ are two lines of profiles for finishing and protecting floors of same level in ceramic, marble, granite, wood or other materials. They are also ideal as separation and decoration joints between floors made of different materials, as perimeter profiles for the shaping of doormats or as protection and finishing of platforms and ceramic steps.
The visible thickness makes the profile an elegant separation element perfectly integrated into the floor.

projoint

Projoint T is a line of profiles for the separation, protection and decoration of same-level floors in ceramic, marble, granite, wood or other materials. It is also ideal to cover any imperfections due to the cutting or for the laying of floors made of different materials. Its special section allows to cover slight height differences (2÷3 mm) between two different types of floor. It is also easy to install, thanks to the arrow shape which allows a perfect fixing with sealants or adhesives.

22/A aluminium covered with Alcrom® Plus black 97

profiles for floors of different height

The range of profiles for floors of different height is made with a sloping section and allows to connect floors with different thicknesses. Products made of stainless steel, brass or aluminium, are chosen according to the target environment.

cerfix® pronivel

Pronivel NZS / is a line of connection between floors of different level composed by a bearing profile and two connection wings of different size. Together the two pieces allow the elimination of the step between floors of different thickness. The articulated connector permits many combinations and the laying of a new flooring on the side of the connector , even after the application of NZS /.

movement joints

A line designed to permit the expansion and contraction that materials undergo as a result of the seasonal temperature. A wide range of finishes to suit different stresses to which the coating is subjected.

cerfix® projoint

Projoint DIL NE is an expansion joint in co-extruded PVC. Suitable for the laying with glue, it is available in three colors and four heights and it is suitable for large areas with pedestrian traffic. Set on the joints created on the screed, it allows to absorb stresses of compression and expansion.

Projoint NZS is an expansion joint in aluminium with high absorption. Thanks to the 2 interlocking parts, the joint can absorb movements of +/- 5 mm with articulated flins that permit tridimensional movements. The structure of the joint protects the edge of the tile, and it bears the pedestrian and vehicular passage. NZS is also available as a joint cover (when tiles are already laid), NZS/A, or side joint for industrial buildings, NZS/L.

cerfix® procover

Procover Flex is a line of structural aluminium joint covers designed to withstand traction and compression transverse movements of large buildings. They withstand both pedestrian and vehicular traffic with rubber wheels (cars). Procover Fix is a line of flat joint cover profiles in aluminium for coplanar floors (GJA/) and perimeter joint cover profiles for the connection of floors and walls (GWA/), suitable to cover structural movements of expansion or compression of two different structures.

waterproofing, drainage, uncoupling

A line of waterproofing, uncoupling and draining membranes for the laying of ceramic floors and coverings of bathrooms, balconies, terraces and problematic supports.

wpstop

WPstop is a waterproof membrane in polyethylene with a textile in polypropylene in both sides in order to facilitate the grip of the adhesive, thus ensuring a high adhesion to the support. It is particularly suitable for the waterproofing of floors and tiled walls of bathrooms. PAIG/ are special pre-formed pieces for waterproofing the internal corners of floor-level showers using Glass Profile GPS1 and GPS3.

wpstop

WPstop 3 is an uncoupling, waterproofing and anti-fracture membrane for indoor and outdoor use, particularly recommended before the laying of floors of bathrooms, balconies, terraces and problematic supports. WPstop Drain 10 is a draining membrane in high-density polyethylene (HDPE) with truncated cones structure and a filtering permeable fabric on the upper side. WPstop Drain 10 complies with the regulation UNI 11493-1 which requires a protective draining layer in case of waterproofing under the screed.

profiles for balconies and terraces

A functional and stylish line for the protection of terraces, balconies and pavements. The effectiveness of the protecttion decorates and completes every architectural detail.

cerfix® protec

Protec CPCV and CPCI are a series of edge profiles for the protection and the finishing of the outside edges of terraces and balconies. Available in colour-coated aluminium and stainless steel, they have been designed with a protruding section and can be used with tiles thicknesses up to 21 mm. In addition to protecting and finishing the outside edges, they guarantee the outflow of water from the floor, avoiding the contact with the outside border.

Protec CPCV is also available in the bendable version CPCVF, provided with a special cutout that allows to bend the profile with a radius up to 1 meter.

cerfix® protec

Protec CPNV is a series of edge profiles for the protection and the finishing of the outside edges of terraces and balconies. Available in colour-coated aluminium, they can be installed flush with the border or detached from it. Their special section makes them suitable for the protection of the borders of steps or sidewalks, since it hides the junction between the tread and the riser. Protec CPNV is also available in the bendable version CPNVF, provided with a special cutout that allows to bend the profile with a radius up to 40 cm.

cerfix® protec

Protec CPGV is a perimetral profile for the protection and finishing of the outside edges of terraces and balconies. This profile is composed of a vertical part that facilitates the outflow of rainwater from the tiled surface and protects the border of the floor, and a sloping part equipped with holes for a further discharge of the water seeped under the tiles. This technical solution and the consequent drainage reduce the problems of freezing and thawing and the unsightly efflorescences on the tiles grouts. It can be used with tiles thicknesses up to 12,5 mm.

cerfix® protec

Protec CPHA - CPHV is an edge profile in anodised and colour-coated aluminium for terraces, balconies and sidewalks. The shape allows the outflow of water, avoiding the direct contact with the screed. Installed along the perimeter, it allows to outline the ceramic tiles and to protect the border in many fields of use. It can be used with tiles thicknesses up to 21 mm.

Protec CPLV is a line of perimetral profiles in colour-coated aluminium, for the protection and finishing of the borders of outdoor raised floors, terraces or balconies. They are composed of a drilled base CPLB to be screwed to the supports, or, as an alternative, a cut base CPLB/2 for glued tiles, and a visible profile to be fixed with adhesive, available in 3 different heights according to the floor thickness. There are also special accessories for the creation of external corners and junctions.

stair nosing profiles

Protection, finishing and safety. Protect and Prostep are two ranges of stair nosing profiles for stairs for public and private use.

cerfix® prostep

Prostep SGA, SGI, SGN and SGK are profiles for the realization and protection of ceramic, marble and stone steps. Thanks to the rounded section, they give elegance to the steps. The models in chromium-plated brass and anodized aluminium are not recommended in case of intense foot traffic, while those in stainless steel are particularly suitable for heavy foot traffic.

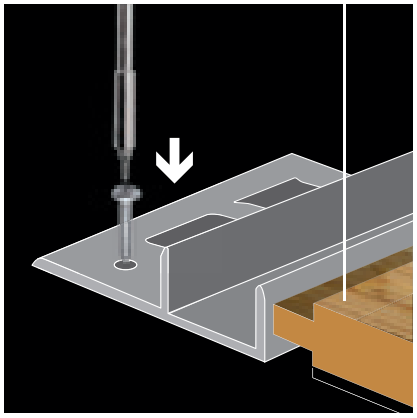
profiles for wooden, laminate and LVT floors

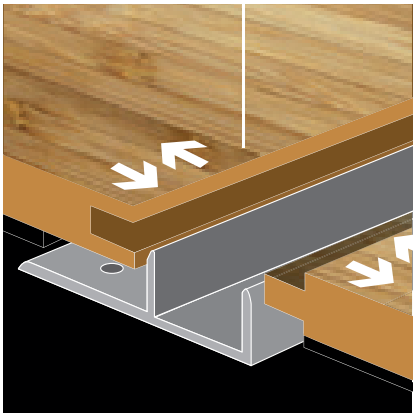
A full range of profiles for wooden, laminate and LVT floors. A series of systems and professional solutions proposed in different colours of anodised aluminium and in the exclusive finishes Alcrom® Plus, with the possibility of further customization thanks to PDS technology.

unisystem plus

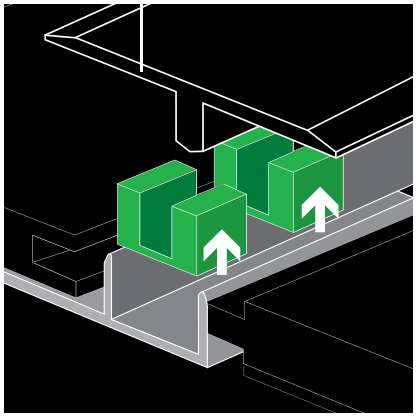
Unisystem Plus is a system for the floating installation of wooden and laminate floors from 6,5 to 22,6 mm thickness. Composed of connection profiles for same and different level floors, perimetral profiles and stair nosing profiles, Unisystem Plus is easy to lay and simple to remove. The system is composed of a top profile, an aluminium base and a fixing clip: after inserting the fixing clip in the top profile, just push the top profile to fix it to the aluminium base.



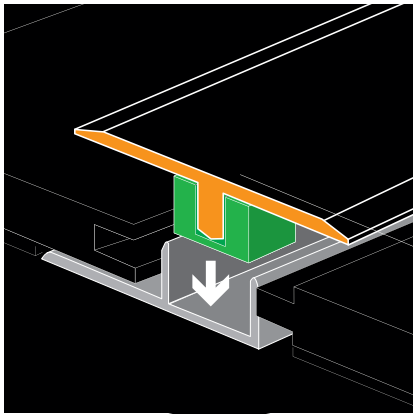
fix the aluminium base to the subfloor with screws or glue



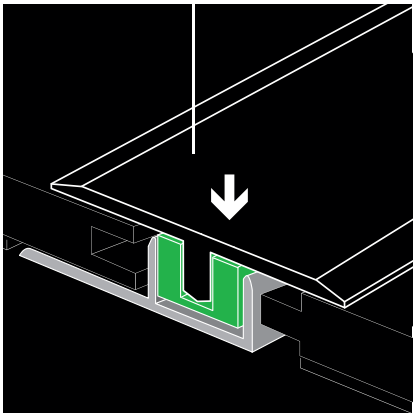
bring the floor planks closer



insert the clips in the top profile

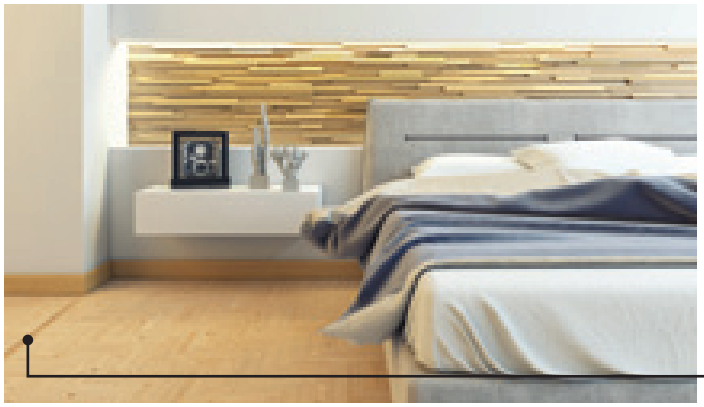


put the top profile in the base



push the top profile in the base

Unisystem Plus line



Connection profiles for floors of same level

unisystem - unisystem plus

Unisystem Plus is a system for the floating installation of wooden and laminate floors from 6,5 to 22,6 mm thickness, composed of junction profiles for same level floors (Z/ series), connection profiles for different level floors (C/ series) and perimetral profiles (S/ series). The system is composed of a natural aluminium base and a top profile to be fixed on the base through a specific clip. The top profile is available in different finishes of anodised aluminium or covered with wood-effect Alcrom® Plus film for matching the floor perfectly.

profix thin

Profix Thin is a system for the floating installation of LVT floors from 4 to 8 mm thickness, composed of junction profiles for same level floors (Z/4), connection profiles for different level floors (C/4) and perimetral profiles (S/4). The system is composed of a PVC base and a top profile available in different finishes of anodised aluminium or covered with wood-, stone- or concrete-effect Alcrom® Plus film for matching the floor perfectly.

prestowood

Prestowood 22/A, 50/A and 63/A are adhesive profiles for wooden floors of same level, different level and stairs that have been already installed. In anodised aluminium, or covered with Alcrom® Plus film, they are particularly easy and quick to install, thus becoming suitable also for the DIY.

cerfix® projoint - pronivel

NZA/ is an expansion joint in aluminium composed of two interlocking and sliding profiles. Suitable for LVT floors and tiles of small gaps, it guarantees a good resistance to loads and intense foot traffic. This item can be 3 mm high and, therefore, suitable for the application on substrate joints in glued LVT; it can also be 5 mm high and, in this case, thanks to the exclusive solution with the adhesive integrated with the internal anchor flange, it can be fixed directly to the board and it is the perfect joint for LVT floating floors with a uninterrupted surface and perfectly flat.

Profilpas Digital System
no limits to imagination

Profilpas gives the possibility to choose between over 400 standard decors Alcrom® Plus to combine the chosen profile or skirting board with the floor perfectly: indeed, a wide selection of wood, stone or concrete decors is available in our database to meet every need. Just consult our PDS bunch to discover the decor that best suits to your wish of combination.

But that's not all. The possibility of customization is really limitless with Profilpas. We just need to receive a sample for creating any further decor, even a fantasy one!

This is possible thanks to Profilpas Digital System (PDS), the innovative digital printing technology of Profilpas to reproduce any decor on Alcrom Plus film and not to give limits to imagination! The whole production process is made inside our factory: from the scanner to the printing and the application of the film.

Please note: for customizations with decors that are not in our database, there is an extra of € for decor.

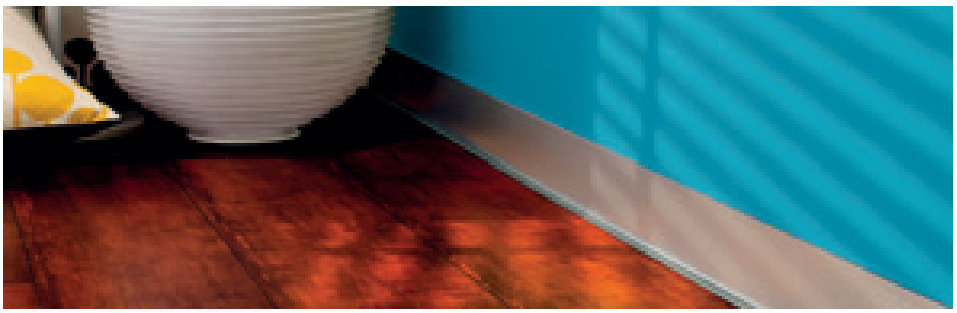
metal line skirting board

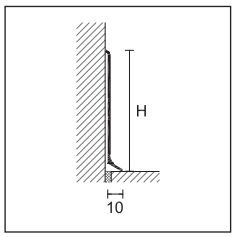
To choose Metal Line means giving importance to details because they are the ones who make the difference. Metal Line is distinguished by its versatility and functionality, but also for its inspiration to contemporary design. It is an innovative line, rich of solutions with a wide variety of combinations and colours capable of satisfying every housing need, from small and large gathering places. Stainless steel and aluminium, materials that give shape, colour and size to the space, minimalist signs that follow the flow of everyday life. Metal Line can provide a continuum of profiles that integrate perfectly into environments and different styles, enhancing their aesthetic and architectural appeal. Metal Line becomes a trend line, thanks to Profilpas research on materials and shapes and to the attention of the company to the world of furniture and design.

metal line

Metal Line 90 is an aluminium skirting board, available in different finishes, that creates an elegant junction between the wall and the floor. Thanks to the curved section, this skirting board perfectly hides the perimetral expansion gap of a floating floor. Metal Line 90 is also available in white and black Trend Color Stone, two matt colours that perfectly match the most modern ceramic coverings. All the models can be curved through the specific Proflex Machine.



90/10 silver anodised aluminium



Metal Line 90 white stone colour-coated aluminium

Metal Line 90/6 silver anodised aluminium

PRO FLEX LINE

Metal Line 90 can be curved by using Proflex Machine + wheels kit for Metal Line 90 (vedi pag 267)

The self-adhesive version in height 4, 5, 7, and 10 is available on request, with a minimum order of 200 meters and a surcharge of €/mt

RAL 9003, RAL 7038, RAL 8019, RAL 9006, RAL 9007 colour-coated aluminium skirting boards are available on request, with a minimum order of 300 meters. For other colours, please contact our sales department.

metal line

Metal Line 87/6 and 88/6 are two flush recessed skirting boards for plaster and plasterboards. Both are composed of two separate elements: a base in natural aluminium and an insert in silver anodised or matt white colour-coated aluminium. Once installed, the skirting board integrates perfectly into the wall surface, outlining the perimeter of the space without limiting it. There are two different phases of installation: the base element must be installed when the room is still in its rough state, while the chosen insert must be put after the laying of the floor.

Metal Line 97/8 is a 8 cm high aluminium skirting board specially designed for housing cables thanks to the specific PVC cable trunking that, fixed to the wall with screws and dowels, also acts as support of the skirting board. It is particularly suitable for renovations as it avoids making new tracks for the passage of cables. It is also easy and quick to install only using natural aluminium supports that, fixed to the wall with screws and dowels, make the access to service cables easy.

PVC line skirting board

A range of PVC skirting boards to meet all technical and aesthetical needs. Suitable for both professional and DIY use, some models can be customised using digital printing technology PDS.

pvc line

PVC Line 8605 and 8606 are two skirting boards in co-extruded PVC, characterized by a rounded shape and a 70-mm height. Both are composed of a core in foam PVC and a visible surface in coloured rigid PVC to guarantee the best aesthetic result and colour uniformity. 8605 can also be covered with Alcrom® Plus film and can be further customized thanks to the digital printing technology Profilpas Digital System. 8505 and 8606 can be fixed to the wall with adhesive (PP/96) or nails. Moreover, they do not absorb water and are resistant to impact, wear and tear, UV rays and the products normally used for cleaning floors and wall coverings.

no partial packaging - 8606 can be covered with customised Alcrom® Plus film on request, with a minimum order of 500 meters €/m

PVC Line 8608 is a skirting board in PVC foam, characterized by a round shape and covered with Alcrom® Plus film. Available in several decors, it can be further customized thanks to the digital printing technology Profilpas Digital System. 8608 can be fixed to the wall with adhesive (PP/96 or similar), nails or special fixing clips. PVC does not absorb water, does not contain formaldehyde, is resistant to shocks, wear (certificate AC3), UV rays and the most common cleaning products for floors and wall coverings.

pvc line

PVC Line 8615 and 8616 are two skirting boards in co-extruded PVC, characterized by a square shape and a 70-mm height. Both are composed of a core in foam PVC and a visible surface in coloured rigid PVC to guarantee the best aesthetic result and colour uniformity. They can also be covered with Alcrom® Plus film and can be further customized thanks to the digital printing technology Profilpas Digital System.
8515 and 8616 can be fixed to the wall with adhesive (PP/96) or nails. Moreover, they do not absorb water and are resistant to impact, wear and tear, UV rays and the products normally used for cleaning floors and wall coverings.

pvc line

PVC Line 148 is a skirting board for carpet and PVC coverings, composed of a base in rigid PVC and clip in soft PVC. Used as internal corner connection profile, it creates a curvature on the corner once the covering has been laid. It also allows to finish and cover the extremities of the carpet or the PVC covering, thus covering any cutting inaccuracies. This profile is recommended for public spaces such as hospitals and schools.

prolight

Prolight is a line of light profiles with direct and indirect lighting. The integration of the LED technology with Profilpas profiles allows to customize every space. Available in warm, neutral or RGB light and provided with dimmer, they are easy to install and give the suitable light for each use, from the spaces for relaxation to work ones.

cerfix® prolist

Prolight Prolist LLA and LLB are two aluminium decorative listellos with direct LED light. Suitable for framing mirrors and walls and illuminating recessed niches and shelves, these profiles add value to the space, finding an ideal location in bathrooms, kitchens and private space in general. Prolight Prolist LLA/20/10, in particular, is perfect for shower recessed niches to create pleasant plays of light.

89/6L silver anodised aluminium

HOW TO ORDER THE ELECTRICAL COMPONENTS

LED (white light)

Measure how many meters of LED strip have to be positioned on our profiles. A spool is 5 meters long. Spools have 120 LED every meter. The voltage is 24 volt. The consumption is 9,6 watts every meter. To determine the consumption, length must be multiplied by 9,6 watts.

Example: calculation of the watts consumption = 7,4m x 9,6W = 71 total watts

Choose the colour of the light. LED strips are available in neutral white light (4000 °K) or warm white light (3000 °K).
Choose the degree of protection: IP33 for inside and dry spaces, IP67 for outside or moist spaces.

POWER SUPPLIES

Choose the suitable power supply on the basis of the total watts and so as not to exceed 90% of the maximum power.

Example: 71W : 90 x 100 = 79W - use a power supply of 90W

	ART.		
from 5 cm to 5,5 m	60W	**AL/60/24**	84150
from 5,6 m to 8,4 m	90W	**AL/90/24**	84152
from 8,5 m to 11,2 m	120W	**AL/120/24**	84154
from 11,3 m to 14 m	150W	**AL/150/24**	84156

We recommend to power the LED strips every 3 meters in order to avoid differences in brightness and the overheating of the LED in the initial part of them. A cable with 1 mm² section has a maximum range of about 4 Amp and a voltage drop of 1 Volt every 10 meters. For special installations, please contact our Technical Department.

DIMMER (optional)

The dimmer/fader/driver has the function to adjust the light intensity of LED light, it supports maximum 10 Amp to an equal extent of 25 linear meters of our LED strip. It must be placed between the power supply and the LED strip and connected to a switch (not supplied) and/or to the receiver of the remote control (optional).

In case of more lines with simultaneous turning on, the first dimmer is connected in Sync mode and it will switch on the consecutive dimmers.

Example: to connect 3 lines with simultaneous turning on, you need to use 3 dimmers.

REMOTE CONTROL + RECEIVER (optional)

The remote control is a radiofrequency and can control up to 4 channels; it is used to turn on/off the LED.

The receiver must be installed between the power supply and the LED strip or connected to the dimmer if present.

If there is also the dimmer, the remote control can adjust the LED light intensity.

ELECTRICAL CABLES

The cables are necessary to connect the power supply to the LED strips where needed.

A cable with 1 mm² section has a maximum range of about 4 amps and a voltage drop of 1 volt every 10 meters.

CONNECTORS

Art. IR/C01 connects the LED strips to the line of power supply.
Art. IR/W3 connects maximum 3 cables among them.

LED RGB (coloured light)

Measure how many meters of LED strip have to be positioned on our profiles. A spool is 5 meters long. Spools can be cut every 10 cm. The voltage is 24 volt. The consumption is 14,4 watts every meter. To determine the consumption, length must be multiplied by 14,4 watts.

Example: calculation of the watts consumption = 7,4m x 14,4W = 106,6 total watts

RGB LED strips are available in degree of protection IP67, are covered with silicone sheath and are provided with adhesive for the fastening in inside or outside spaces.

POWER SUPPLIES

Choose the suitable power supply on the basis of the total watts and so as not to exceed 90% of the maximum power.

Example: 106,60W : 90 x 100 = 118W - use a power supply of 120W

	ART.		
from 10 cm to 3,7 m	60W	**AL/60/24**	84150
from 3,8 m to 5,5 m	90W	**AL/90/24**	84152
from 5,6 m to 7,5 m	120W	**AL/120/24**	84154
from 7,6 m to 9,3 m	150W	**AL/150/24**	84156

We recommend to power the LED strips every 3 meters in order to avoid differences in brightness and the overheating of the LEDs in the initial part. A cable with 1 mm² section has a maximum range of about 4 amp and a voltage drop of 1 volt every 10 meters. For length over 9,3 meters, see SLAVE paragraph. For special installations, please contact our Technical Department.

REMOTE CONTROL

The remote control is a radiofrequency and can control up to 4 channels; it is used to turn on/off the LED, adjust light intensity and choose the colour or the sequence of LEDs.

MASTER CONTROL UNIT

Connected with the remote control, it is used to turn on/turn off/adjust light intensity and to choose the colour or the sequence of LEDs.

It must be connected between the power supply and the LED strip.

SLAVE CONTROL UNIT

Every time that the system needs more lines controlled by just one unit, there is the need to add 1 slave for every added line.

Example: to connect 3 lines with simultaneous lighting, you need to use 1 master control unit and 2 slave control units.

The slave control unit must be connected to the master control unit with RJ11 6-poles cable (not supplied).

ELECTRICAL CABLES

The cable has 4 poles, 3 of them have a 0,5 mm² section (for the three colours), one of them has a 1 mm² section (for the negative pole).

CONNECTORS

Art. IR/C02 connects the LED strips with coloured light to the line of power supply, length of 15 cm.
Art. IR/C03 connects LED strips to LED strips with coloured light, length of 15 cm.

We recommend to assign the assembly of the electrical components to qualified staff.

Electrical components and accessories for Prolight profiles. Each element has to be chosen depending on the established length of the light profiles. It is necessary to calculate the power consumption in W/m for choosing one or more power supplies to be combined with the dimmer and the controller.

entrance mats

Promat is a modular technical mat designed for both public and private use. Thanks to its easy assembly with a simple interlocking system, Promat does not need specific expertise and can be assembled directly on site. Promat is available in three insert solutions: carpet, brushes or rubber. In this way, it guarantees the cleaning and the protection of floors against dust, filth in general and water.

promat

Promat is a modular technical mat, which can be customized and created in any size directly on site, allowing maximum operational flexibility. The installation of Promat is easy and quick thanks to the interlocking system with silver anodised aluminium profiles, already equipped with inserts in black carpet, rubber or brushes. The carpet insert, recommended for internal use, absorbs finer dirt and water, and also aids drying when passing through. The rubber insert is resistant to atmospheric agents, making it ideal for outdoor use, removes coarse dirt and also has a non-slip function. Lastly, the brushes insert is suitable for outdoor installation in area of high pedestrian traffic thanks to its ability to remove the most difficult dirt. Promat can be installed recessed or overlapped on existing floors according to the needs. In case of overlapping installation, there is the possibility to insert the ramp profile for facilitating the access. Promat is also available in two already-assembled and ready-for-use versions in a choice of carpet or rubber/brush mix, in sizes 70x39,5 cm and 90x49,5 cm.

supports for raised floors

With the new supports for raised floors PP Level Duo® by Profilpas, there is the possibility to choose between fixed and self-levelling head in an instant, directly during the installation.
A choice that can be made easily, thanks to the special converter Perfect Ring. Indeed, if you insert it between the head and the screw, the support becomes fixed. On the contrary, if there is the need to compensate the slope of a surface up to 6%, it will be sufficient not to insert the ring to obtain a self-levelling system.

pp level duo® - complete support

PPlevelDUO®

- speed of installation: just 5 seconds to assemble the support.
- height adjustment from the top through adjustment key.
- adjustable supports with wide excursion of available heights.
- the solid and blunt base impedes the incision of the waterproofing membrane.
- acoustic insulation: noise-proof rubber intergated with the head.
- a system of draining holes and canalizations impedes the stagnation of water in every part of the support.
- solid support base of 340 cm^2 for a better distribution of the weight.
- precise adjustment of the slope to guarantee a perfect flat surface.
- usable in spaces with temperatures from - 40° C to + 80° C.
- pre-cut tabs for 2, 3 and 4 mm joints.
- ecological: all the support is made of recyclable plastic materials.

NEW

- stackable extension of 10 mm thickness. It allows to increase the overall height in combination with PP Level DUO or PP Level FIX, assembling two or more elements through the specific plugs.

pp level duo® - double joist system

PP level DUO® - double joist system

The aluminium joists system is the ideal solution for the installation of single-format and multiformat ceramic tiles. Thanks to this system, the installation is always precise and, at the same time, guarantees great stability and resistance.
Profilpas double joist system is composed of two joists in natural aluminium that must be fixed on a special head, thus creating a rail for the positioning of the spacer. The spacer, thanks to its removable tabs, guarantees a correct position of the tiles and creates the 4-mm joint.

- the double joist system is not visible from the joint.
- the double joist system avoids water stagnation and the accumulation of dust and filth.
- thanks to the space between the two joists, it is possibile to adjust the height of the support through the specific key.

pp level duo® - accessori

Among the accessories for the installation of outdoor raised floors, in addition to the adjustment key, there are rubber disks, levelling disks and a full system for the creation of steps and vertical risers. PCC/01, PCC/04 and PCC/02 are stainless steel clips to be installed on the head and under the base of perimetral and corner supports: the tile must be positioned between the two clips in order to create a perfect step. This result can be also obtained with PCC/03 and PCC/05, two clips for the installation close to vertical walls that allows to keep always the same distance between the wall and the tiles.

cerfix® protec

Protec CPLV is a line of perimetral profiles in colour-coated aluminium, for the protection and finishing of the borders of outdoor raised floors, terraces or balconies. They are composed of a drilled base CPLB to be screwed to the supports, or, as an alternative, a cut base CPLB/2 for glued tiles, and a visible profile to be fixed with adhesive, available in 3 different heights according to the floor thickness. There are also special accessories for the creation of external corners and junctions.

accessories for installation

Levelling systems for tiles installation, spacers, adhesives, utensils, systems and accessories.

Protiler is a levelling system for the laying of ceramic and stone tiles. It is suitable for thicknesses from 3 to 20 mm and impedes the vertical movement between tiles during the adhesive grip phase. Specific pliers are available for the laying of floors and coverings for less effort and saving time.

ART.		
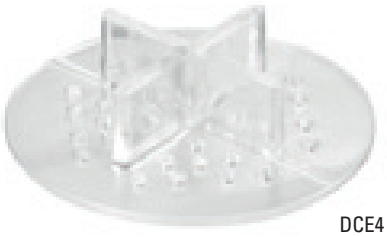
DCE4	cross spacer for outdoor tiles and 4-mm grouts ***euro/pc (euro/bag)***	19076

no partial packaging



DCE4

For a single piece, see sales conditions on page 288

Spacer FIVE is a multi-thickness spacer for tiles: just one product for creating different grout spacing of 0,5 - 1 - 1,5 - 2 - 3 mm. The spacer can be used for laying both floors and wall coverings and complies with the regulation UNI 11493-1 since it has been designed to be easily removed and to be used more times. Five Spacer DF guarantees a perfect, quick and cheap laying.

spacer FIVE

For a single piece, see sales conditions on page 288

Plastic cross and T spacers used in the installation of floors and wall coverings for creating uniform and precise grout lines. They are available for thicknesses up to 10 mm and are suitable for both inside and outside spaces. Both spacers are compliant with UNI 11493-1 standard (methods for the correct installation of ceramic tiles).
Plastic wedges used for recovering small differences in height during tile installation.

MATERIALS AND CHARACTERISTICS

The following information summarize the main characteristics of the materials. Further information are available upon request of the product specifications.

NATURAL BRASS
Alloy CW624N UNI EN 12167 The profiles are produced by extrusion. They have a good resistance to chemical agents and mechanical stresses.On the visible parts the brass naturally oxidezes that creates a superficial glaze. The brass, when exposed to corrosive agents or high humidity, is subject to phenomena of high oxidation and can present superficial spots. Where necessary, it can be restored to its original state by using abrasives or specific polishing products.

POLISHED BRASS
Alloy CW624N UNI EN 12167 The profiles are produced by extrusion and then mechanically polished. The visible surface must be protected from scratches and frictions. The resistance to chemical agents and mechanical stresses is good. On the visible parts the brass naturally oxidezes that creates a superficial glaze. The brass, when exposed to corrosive agents or high humidity, is subject to phenomena of high oxidation and can present superficial spots. Where necessary, it can be restored to its original state by using abrasives or specific polishing products.

CHROMIUM - PLATED BRASS
Alloy CW624N UNI EN 12167 The profiles are produced by extrusion and then chromed. They are resistant to ultraviolet rays, weathering and chemical agents.They are not suitable for applications in floors with intense mechanical stresses.

NATURAL ALUMINIUM
Alloy of Al-Mg-Si thermically treated in conditions T6 (6060 T6) The profiles are produced by extrusion and guarantee a fair resistance to athmospheric and chemical agents. The cement and its derivates produce, if wet, alchaline substances that, acting on the surface, can corrode the metal (formation of hydroxide of aluminium). For that reason, the visible surface of the profile must be immediately cleaned from cement, glue and other materials used for joints.

ANODISED ALUMINIUM
Alloy of Al-Mg-Si thermically treated in conditions T6 (6060 T6) The profiles are produced by extrusion and then anodised.They have a good resistance to athmospheric and chemical agents.The cement and its derivates produce, if wet, alchaline substances that, acting on the surface, can corrode the metal (formation of hydroxide of aluminium). For that reason, the visible surface of the profile must be immediately and gently cleaned from cement, glue and other materials used for joints. Wear and pedestrian traffic could damage the surface (in cases of profiles layed on the floor) and remove the original anodised finish.

POLISHED ALUMINIUM
Alloy of Al-Mg-Si thermically treated in conditions T6 (6463 T6)
The profiles are produced by extrusion and then mechanically treated and processed. They guarantee a fair resistance to athmospheric and chemical agents. The cement and its derivates produce, if wet, alchaline substances that, acting on the surface, can corrode the metal (formation of hydroxide of aluminium). For that reason, the visible surface of the profile must be immediately and gently cleaned from cement, glue and other materials used for joints. Polished aluminium profiles are not suitable for floor applications.

COLOUR - COATED ALUMINIUM
Alloy of Al-Mg-Si thermically treated in conditions T6 (6060 T6) The profiles are made by extrusion and then coated with a thickness of ≥ 80 µm. They have
a fair resistance to atmospheric and chemical agents while they do not have a good resistance to mechanical stesses that would damage the surface enamel; therefore they are not recommended for floor applications. For that reason, the visible surface of the profile must be immediately and gently cleaned from cement, glue and other materials used for joints.

ALCROM® PLUS FOILED ALUMINIUM
Alloy of Al-Mg-Si thermically treated in conditions T6 (6060 T6) The profiles are produced by extrusion in natural alloy. The wood decoration is obtained by foiling the aluminium profiles with a special film Alcrom® Plus, resistant to wear, perfectly reproducing grains and colours of wood.

STAINLESS STEEL - AISI 430 - DIN 1.4016
This kind of stainless steel has a moderate resistance to corrosive agents. We recommend its use exclusively for indoor use.

STAINLESS STEEL - AISI 304 - DIN 1.4301 V2A
It is extremely resistant to most chemical and atmospheric agents, lime, mortar, tile glue and common cleaning products. It is recommended for outdoor use, food processing industry, hospitals, etc.

STAINLESS STEEL - AISI 316 – DIN 1.4404 V4A
It is extremely resistant to most chemical and atmospheric agents, lime, mortar, tile glue and common cleaning products. Moreover it has a good resistance to chlorine and salt. Particularly indicated in extreme conditions of use.

LAYING - WARNINGS:
even stainless steel can be damaged if not treated with proper precautions during the laying stages. In particular, pay attention to: keeping the profiles protected inside their individual packaging up until the installation. (this precaution allows to avoid the contamination with other ferrous materials during the transport). Avoiding the direct contact with cleaning products for cotto tiles and marble, decalcifying agents and cleansers containing chlorine and its compounds. Pay attention to the gases of hydrochloric acid which may develop during the cleansing of special floors. After the laying, proceed immediately with an accurate cleaning of the surface with plenty of water and the consequent drying.

MAINTENANCE:
the frequent cleaning is essential to preserve the beauty of stainless steel profiles surfaces. Pay close attention to the treatment of the profiles' surface during the installation. Immediately after installation, clean by rinsing the surfaces accurately. Avoid the use of abrasive products that may scratch the profile. Do not use cleansers containing chlorine and its compounds, such as bleach, muriatic acid, decalcifying agents. Do not use abrasive sponges or wire wools that may scratch the surface or leave rust stains.

CHROMIUM-PLATED STAINLESS STEEL - AISI 304 - DIN 1.4301 (profilpas design)
It has a refined aesthetic value. It is suitable for wall coverings but not for floors: the cleaning maintenance should be done with sponges or soft and non-abrasive cloths. We suggest to use neutral detergents.

Rigid PVC
Vinyl compound of rigid PVC unleaded, anti shock, non-flammable. Mixture eco-friendly with Ca-Zn salts.

Plasticized PVC
Vinyl compound of plasticized PVC unleaded, non-flammable. Mixture eco-friendly with Ca-Zn salts.

Foam PVC
Vinyl compound of plasticized PVC unleaded, non- flammable. Mixture eco-friendly with Ca-Zn salts.

Co-extruded PVC - Rigid/Rigid
Vinyl compound of rigid PVC unleaded, anti-shock non-flammable. Mixture eco-friendly with Ca-Zn salts.

Co-extruded PVC - Plasticized/Plasticized
Vinyl compound of plasticized PVC unleaded, non- flammable. Mixture eco-friendly with Ca-Zn salts.

Co-extruded PVC - Rigid/Plasticized
Vinyl compound of rigid PVC unleaded, anti-shock, non-flammable. Mixture eco-friendly with Ca-Zn salts. Vinyl compound of plasticized PVC unleaded, non-flammable. Mixture eco-friendly with Ca-Zn salts.

Co-extruded PVC - Rigid/Plasticized anti-mould
Vinyl compound of rigid PVC unleaded, anti-shock, non-flammable. Mixture eco-friendly with Ca-Zn salts. Vinyl compound of plasticized PVC unleaded, non-flammable, addicted with biocide. Mixture eco-friendly with Ca-Zn salts.

Co-extruded PVC - Foam/Plasticized
Vinyl compound of foam PVC unleaded, non- flammable. Mixture eco-friendly with Ca-Zn salts. Vinyl compound of plasticized PVC unleaded, non- flammable. Mixture eco-friendly with Ca-Zn salts.

ADVICES FOR CLEANING AND MAINTENANCE

MATERIAL	FINISHING	CLEANING AFTER LAYING	MAINTENANCE
aluminium	anodised	Use of acid based cleaners and not alkaline	exclusive use of neutral cleaning products
aluminium	bril. polished	Use of acid based cleaners and not alkaline	exclusive use of neutral cleaning products
aluminium	bright polished copper	Use of acid based cleaners and not alkaline	exclusive use of neutral cleaning products
aluminium	bright polished titanium	Use of acid based cleaners and not alkaline	exclusive use of neutral cleaning products
aluminium	bright polished gold	Use of acid based cleaners and not alkaline	Exclusive use of neutral cleaning products
aluminium	color-coated	Use of acid based cleaners	use neutral or alkaline detergents
aluminium	bright satin	Use of acid based cleaners and not alkaline	exclusive use of neutral cleaning products
aluminium	riv. Alcrom Plus	Use of acid based cleaners	Exclusive use of neutral cleaning products
stainless steel	polished	Use of acid based cleaners without chlorine	use neutral or alkaline detergents
stainless steel	Inox AISI 316	Use of acid based cleaners	exclusive use of neutral cleaning products
stainless steel	sandblast	Use of acid based cleaners only neutral	use neutral or alkaline detergents
stainless steel	satin	Use of acid based cleaners without chlorine	use neutral or alkaline detergents
brass	natural	Use of acid based cleaners only neutral	exclusive use of neutral cleaning products
brass	polished	Use of acid based cleaners only neutral	exclusive use of neutral cleaning products
brass	chromium - plated	Use of acid based cleaners	use neutral or alkaline detergents
PVC		Use of acid based cleaners and not alkaline	exclusive use of neutral cleaning products

PROFILES CHARACTERISTICS AND PACKAGING

SELF-ADHESIVE PROFILES
Self-adhesive profiles are made of non-toxic, non-flammable and solvent free hot-melt glues. Although these products are non-flammable, it is recommended not to expose them to naked flames. Product preservation is guaranteed when stored in “normal” climatic conditions.
Glue deteriorates at temperatures over +90°C and crystallizes at temperatures below -15°C. During the application, the temperature of self- adhesive profiles and the ambient temperature where profiles have to be laid should not be below +10°C.
Important: self-adhesive profiles cannot be laid on friable supports, as junction between two carpet floors or between PVC floors and wall coverings.

DRILLED PROFILES
Screw-mounted profiles are drilled according to the model and the material at issue, so that to lodge 3 mm or 3,5 mm screws, either flat-head or round- head ones.

PACKAGING
The ▬ means blister packaging.
“Individually packed” means that the packaging is made for the single profile with a protective heat shrink film.

MEASURES - TOLERANCES - REFERENCES NORMS - CERTIFICATION ON PRODUCT
Please note that the information and the drawings in the present catalogue are not binding.
The data about measures, such as length, thickness and width refer to nominal measures. The foreseen tolerances, the related norms and reference certifications are indicated in the specifications of products, available on request.

DIRECTIONS
The resistance to chemical products depends on their degree of chemical aggressiveness and therefore it is necessary to make sure in advance of the effects that products used for profile laying, cleaning and maintenance can produce. In particular lime, mortar or tile glue cause strains on the visible surface of profiles. Therefore it is necessary to clean these parts immediately after the laying of the profiles. Please note that in the present catalogue, due to the printing, the colour shades can be slightly different from the real ones.

GENERAL CONDITIONS OF SALE

These General Conditions shall govern all sales contracts executed between Profilpas S.p.A. and the Buyer and shall prevail on all the Buyer's general or individual purchasing conditions. Any derogation to these General Conditions shall be binding on Profilpas only if accepted in writing by the latter.

1. **Prices**
The prices shown in Profilpas' price list are in Euro per meter but products will be invoiced in Euro per piece with the discounts granted in accordance with the ordered quantities or upon agreement with Profilpas. Prices are exclusive of additional taxes or customs duties. Profilpas expressly reserves the right to modify the prices without notice, in accordance with any fluctuation in the costs of raw materials.

2. **Minimum orders**
The required minimum order value is fixed at the amount of Euro 500,00.

3. **Orders**
Purchase orders must be sent in writing. Orders shall be deemed accepted and binding on Profilpas only after receipt by the Buyer of Profilpas' written order confirmation. Only the discounts and the prices indicated in the order confirmation shall be binding for Profilpas. Should the order confirmation contain amendments with respect to the Order, such amendments shall be deemed tacitly accepted by the Buyer after 5 (five) days from receipt of the order confirmation unless the Buyer notifies its disagreement in writing within the above-mentioned term.

4. **Delivery terms**
Deliveries shall be made EX WORKS (Incoterms 2010) Profilpas warehouse in Cadoneghe (Padova) - Italy. The products shall always be transported at the Buyer's risk according to the Incoterms, and any reimbursements for damages shall be claimed by the Buyer to the carrier in accordance with the relevant agreements and clauses contained in the stipulated insurance policies. Delivery dates are estimated and not guaranteed. Profilpas shall not be responsible for any delay nor for the consequences thereof. In case of delay in delivery, the Buyer shall not have the right to terminate the sales agreement and/or obtain compensation of any direct, indirect or consequential damage suffered, unless in case of intent or gross negligence.

5. **Packaging**
Prices include Profilpas standard packaging. Sea shipment packaging or any other special packaging requested by the Buyer will be charged at cost. Profilpas' catalogue indicates which products have partial packaging and the surcharge applied in such case. In case of products without partial packaging, Profilpas can exceptionally sell them with partial packaging, charging the price on the pricelist without discount.

6. **Terms of payment**
All payments must be made in accordance with the agreed terms of payment; the relevant sums must be transferred to the bank indicated by Profilpas. In case of delay of payment, whether total or partial, the Buyer shall be bound to pay interest on all outstanding amounts calculated according to art. 5 of Italian Legislative Decree no. 231/2002 or subsequent modifications.
Delay or non-payment of any sums due by the Buyer to Profilpas, even if concerning different contractual relationships, shall entitle Profilpas to suspend the preparation and delivery of the products which are the object of the order and of any other order in progress.

7. **Claims**
Claims must be notified in writing to Profilpas within 10 days from the delivery date. Claims for damaged, stolen or missing products shall be lodged with the carrier upon receipt of the products. If no written complaint is lodged with the carrier, Profilpas will not accept any return or replacement of the delivered products. Return of products will only be accepted upon Profilpas' prior written consent and always at the Buyer's expense.

8. **Retention of title (article 1523 of the Italian Civil Code)**
The products shall remain the property of Profilpas until full payment. Non-compliance, or partial compliance, of the agreed payment terms allow Profilpas, without prejudice to any other claim it may have, to recover the products supplied, even if transferred to third parties. The Buyer is liable for any damage to the products due to poor storage or negligence and shall be responsible as a depositary. Profilpas does not assume responsibility for damage to the products consequential or subsequent to the installation of the same.

9. **Warranty and defects**
Profilpas guarantees that the products are free from defects in material and workmanship for a period of 12 months from the date of delivery to the Buyer. Should Profilpas acknowledge the existence of the claimed defects, and provided that it has been promptly notified in accordance with the above mentioned paragraph "Claims", Profilpas' warranty shall be limited, at its discretion, to the replacement of the defective products, free of charge EXW Profilpas' premises (Incoterms 2010), within the normal time required therefor, or to the issue of a credit note for the amount of the defective products, ANY OTHER LEGAL OR CONVENTIONAL WARRANTY OR CLAIMS FOR ANY FURTHER DIRECT, INDIRECT OR CONSEQUENTIAL DAMAGES SUSTAINED BY THE BUYER OR THIRD PARTIES, UNLESS IN CASE OF INTENT OR GROSS NEGLIGENCE, BEING EXPRESSLY EXCLUDED.
The Buyer expressly waives its right of regress according to article 131 of the Italian Consumers' Code.
No products will be returned by the Buyer without prior written permission by Profilpas. Profilpas does not guarantee the compliance of the products to any particular specifications or technical characteristics or their suitability for any use and/or special uses if not to the extent that such characteristics have been expressly agreed in the sales contract. Profilpas is not liable for damages that the Buyer, or third parties, generate by using the products if the damage does not depend on the quality or intrinsic characteristics of the product, but by the choice of purchase and usage of the same by the Buyer.

10. **Industrial and intellectual property**
Profilpas Spa's trademarks, distinguishing signs, designs, photographs of products and/or production and commercial technology shall be considered strictly confidential and shall not be used without prior written authorisation from the same.

11. **Express delivery**
Upon the Buyer's request, Profilpas can offer a service of express delivery. The surcharge for this express service will be communicated with the order confirmation.

12. **Privacy**
Personal and fiscal details which may be acquired directly by Profilpas spa (Via Einstein 38 – Cadoneghe), the data controller, or via third parties, shall be used for contractual purposes, pursuant to law, to manage business relations and promote sales. Said data may be communicated to third parties both in Italy and aboard such as Profilpas spa's network of sales representatives, financial institutions, factoring companies, insurance, debt recovery and business information companies as well as professionals, management consultants and carriers.

13. **Final clauses**
Profilpas sales are governed by the laws of Italy.
In case of dispute, the courts of Padua – Italy shall be the exclusive competent venue.
