WOODEN FLOOR COLLECTION

WOOD EXPERIENCE

"**Miraggio** is everything that is thought to be true within our illusions,
it's a distant world that feeds on our imagination ...
and for this reason, it is tempting to our eyes."

Sharing for innovation

Pininfarina is a design house of international repute, a symbol of Italian style in the world. **Corà** has been culture and passion for wood for over 100 years. The two companies share a history of innovation, excellence and Italian Style.

Corà[®]
WOOD EXPERIENCE

Above all, Pininfarina and Corà share the aim of developing a complete range of technologically cutting-edge products for interiors, offering a people-friendly living experience.

The **Miraggio Collection** is the first step in this direction: creating spaces of well-being.

Rethinking the home concept

Home has gained a new role, increasingly central to everyday life; it is a multifunctional space, where you can spend most of the day, working, studying and enjoying your free time, plus a performing place, designed to ensure your proper mental and physical well-being.

In this context, **Miraggio** aims to give further importance to our homes, seeing them as a retreat of calm in the middle of a fast-paced society: a place to recover yourself, to feel as comfortable as possible, and to reconnect with nature.

Designing places to wonder

Miraggio is inspired by natural ornaments that just like a "mirage" could be seen differently: like a water surface, with the sparkling cutlines of the wooden floor, or as warm and soft sand, with a gentle pattern

created by the wind.

This **nature-inspired wooden floor design** creates a relaxing sensation, aimed to reduce stress by mimicking the feeling of being immersed in nature.

Creating natural landscapes

The decorative textures of **Miraggio** fit both floor and wall surfaces with sinuous elegance and a continuous effect, that makes you dip into a natural dimension and creates relaxing atmospheres, which give you peace and well-being.

Thanks to its design and material versatility, the collection signed by Pininfarina is meant to embellish a wide range of prestigious residential and contract environments – executive offices, boutique hotels, yachts.

Reconnecting with nature

Flooring is an important design element that improves the quality of interior spaces and enhances your well-being.

As nothing may ever replace wood, nothing can substitute the feeling of walking over the warm and smooth **Miraggio wooden floor**.

The collection is designed to be safely walked barefoot thanks to the special **High Care Paint**, a silver ion particle treatment that creates a natural and lasting barrier against hygiene enemies.

Blurring the borders

The idea behind **Miraggio** was to create a continuous flooring blurring the borders between the exterior and interior spaces, thus uniting them into a unique design. This is possible thanks to the "contamination" of the

wooden surface with ceramic elements that perfectly fit the outdoor use. The new Collection also allows creation of interesting patterns, zoning different areas thanks to the limitless combinations of wooden essences and ceramic finishes.

Innovating the floor

A distinctive element of **Miraggio** is the innovative union between the wooden surface and the stoneware one, made possible by a technical-constructive solution that eliminates any difference in thickness between the two materials.

The noble wood layer and the thin ceramic slab are glued on the same type of support: thanks to this constructive detail the installer can lay the stoneware modules with the same joint as the wooden modules, with no tile grout lines, to get a unique experience with both visual and tactile perceptions.

Customizing the interiors

Miraggio is an Italian tailor-made wooden floor. Expert hands shape the curves that characterize the planks, through patient work and cutting-edge mechanical supports, to obtain top precision and processing.

The collection is meant to fit design customization: based on personal style and type of project, our customer can choose the finish, the tone variation, the rhythm between **wood** and **stoneware**, the geometry of the laying design.
